Technical Services Section  
American Theological Library Association

*Theology Cataloging Bulletin*, a quarterly newsletter of the Technical Services Section of the American Theological Library Association, is published during the months of November, February, May, and August. It contains listings of new and changed subject headings and classification numbers in appropriate subject areas as well as other information of interest to religion/theology catalogers.

The subject headings in section one of each issue are selected by Hal Cain (Joint Theological Library, Melbourne, Australia) from the Library of Congress' *Subject Headings Weekly Lists*. Section two contains Library of Congress Subject Headings/DDC Numbers of Current Interest prepared by Paul Osmanski (Marist College Library, Washington, DC) and Library of Congress Classification Additions and Changes prepared by Eric Friede (Yale University Divinity School, New Haven, CT). The general information in this publication (section three) is edited by Lynn Berg (New Brunswick Theological Seminary, New Brunswick, NJ). Submissions for the newsletter should be sent to Lynn Berg at the following address:

**Section One: New and Changed Subject Headings  
from the Library of Congress Weekly Lists**  
compiled by Hal Cain

The subject headings in this list were selected from the Library of Congress Subject Headings Weekly Lists, available on the Library of Congress website at:

**<http://lcweb.loc.gov/catdir/cpso/cpso.html#subjects>**

This list consists of headings selected from the Library's lists numbers 27 to 39. 

The following conventions are used, as in previous lists:

Headings are in a single alphabetical sequence, preceded by MARC tags.  
The record number (Library of Congress control number) follows the heading.  
The absence of the instruction [May Subd Geog] means that the heading is **not**  
to be further divided by place.

The following print constants appear:

UF = Used For  
BT = Broader Term  
RT = Related Term  
SA = See Also

\* Asterisks mark lines (or paragraphs) which are CHANGES.

Selected changes to free-floating subdivisions are at the end of the list.

I hope that this service will continue to be useful to catalogers in theological collections.

DDC Numbers of Current Interest**  
compiled by Paul Osmanski

This list of LC subject headings is selected from Weekly Lists 2001 no. 20 through 2001 no. 26 and accompanied by candidate DDC numbers from Edition 21. The purpose of the list is to provide the classifier assistance for topics of recent interest not mentioned explicitly in Edition 21.

The DDC numbers include all headings newly mapped to the 200 Religion Schedule, as well as others considered to be of interest to theological libraries. The list is not exhaustive, and the schedules and tables should be consulted before applying a number from this list.

**Section Two, Part 2: LC Classification Additions and Changes, B-BX**  
compiled by Eric Friede

The entries in this list were selected from the Library of Congress' LC Classification Additions and Changes Weekly List, no. 29 (July 18, 2001) to no. 41 (August 15, 2001).

The centered class letter identifies the schedule to which page references are made, the edition being named if there is more than one. "Brackets enclose entries represented in the text or index. An asterisk indicates a change in an existing number, caption, etc." -- From the heading preceding each list.

This list also includes some changes and additions outside the B-BX class relating to religious topics.

<b>CC:DA REPORT</b>
---------------------

CC:DA (Committee on Cataloging : Description and Access) has maintained its hectic pace, as it continues its "fast-track" of changes necessitated by the emergence of electronic resources.

Some of its recent work can be found in the 2001 amendments package, published this fall. Highlights include:

A revision of the basic principle upon which part one of the code is based can be found in rule 0.24. Instead of starting from the physical form the item takes, we are now instructed "to bring out all aspects of the item being described, including its content, its carrier, its type of publication, its bibliographic relationships, and whether it is published or unpublished."

The gmd (general material designation) for electronic resources is now officially changed from computer file to electronic resource.

Chapter 9, Computer files, has been completely revised and is now headed Electronic resources. In keeping with the revision of 0.24, there is an acknowledgement that one must consult all appropriate chapters in cataloging a resource. For example, in cataloging a map serial issued as an electronic resource, one must consult chapter 3, Maps, chapter 9, Electronic resources, and chapter 12, Serials in order to bring out all aspects of the item.

Rule 21.1B2d has been revised to allow for entry under Conference name when that conference is named anywhere in the item. It is no longer necessary for the name to be found prominently.

Appendix B, Abbreviations, has been revised to allow for the substitution of standard abbreviations in the series numbering area for the abbreviations found on the item.

There is a new Appendix E listing initial articles to be omitted in names and uniform titles.

Work continues in several other areas, and the 2002 revision package, due out in fall 2002, will be even more significant and is expected to result in a new reissue of the entire work. Highlights include:

Chapter 3, Maps, has been extensively revised and will be reissued in its entirety. The revision process is nearly complete, pending international approval.

Chapter 12, Serials, has also been completely rewritten, will be titled Continuing resources, and will include both serials and integrating resources. For the first time, the code will include rules for unnumbered series, and for looseleaves (integrating resources). The revision is nearly complete, just requiring some final word-smithing before final approval by all parties.

Rule 21.6C2, the “rule of three” for added entries, is being revised to provide an option allowing any or all additional persons or bodies to be given entries.

Rule 21.30J, Title added entries, is being revised to say that all titles should be traced, without exception. The exceptions will be listed as an optional provision.

Further from completion, but possibly completed in time for the 2002 revision package is the new Appendix on Major Changes, detailing what changes are significant enough to require that a new record be created.

Work is moving ahead slowly on a new introductory chapter, which is intended to provide catalogers with a conceptual overview of the cataloging process. The British, who have been charged with preparing a draft of this chapter, have produced an outline, which CC:DA might get a chance to see this next spring.

Finally, work is also proceeding very slowly on a prototype of a reorganized part one, arranged according to ISBD areas, instead of the present arrangement of chapters based on carrier.

**NEWS FROM COVENANT THEOLOGICAL SEMINARY LIBRARY  
ST. LOUIS, MISSOURI**

Covenant Theological Seminary Library has just completed implementation of its new Innovative Interfaces online catalog as part of its membership in MOBIUS. MOBIUS is a consortium of over fifty academic institutions across Missouri, including Covenant, Eden, and Kenrick-Glennon Seminaries in St. Louis. MOBIUS comprises eleven clusters of libraries. Covenant belongs to the Bridges Cluster. The primary purpose of MOBIUS is the Common Library Platform, a union catalog for almost all the academic libraries in Missouri. This creates three tiers of catalogs that can be searched: Covenant's, the Cluster's, and the entirety of MOBIUS. In addition, through the MOBIUS catalog, students and faculty can request items from anywhere in the system via the catalog, using any computer with Internet access, and the items will be delivered to their specific library within two business days. Relevant URLs are: <http://bridges.missouri.edu> and <http://mobius.missouri.edu>.

**NEWS FROM THE LIBRARY OF CONGRESS ABOUT THE DIVISION OF  
CLASS NUMBERS BY PUBLICATION DATE**

As many of you have noticed, some new number spans have appeared in the LC religion schedules. The span for 1951 has been closed off at 2000, and a new area for 2001- has been opened. The BS2555 area is an example:

	Criticism. Commentaries, etc.
	Including "form criticism"
BS2555.A2	Early through 1800
BS2555.A21-Z	1801-1950
BS2555.2-6	1951-2000
BS2555.2	Criticism
BS2555.3	Commentaries
BS2555.4	Sermons. Meditations. Devotions
BS2555.5	Other

<b>BS2555.52-55</b>	<b>2001-</b>
<b>BS2555.52</b>	<b>Criticism</b>
<b>BS2555.53</b>	<b>Commentaries</b>
<b>BS2555.54</b>	<b>Sermons. Meditations. Devotions</b>
<b>BS2555.55</b>	<b>Other</b>
BS2555.6.A-Z	Special topics, A-Z
	Use Cutter numbers at BS2545
	Cf. BS2417.A+, Teachings of Jesus

Concern was raised that, for example, the commentaries in the 1951-2000 span were separated from the commentaries in the 2001- span (by "Other" material 1951-2000 and "Criticism" material 2001-), rather than clustered together under an extended number (such as .32 or .33, etc. rather than jumping to .53). Milicent Wewerka (CPSO, Library of Congress) responded to a recent inquiry on this issue by Chris Schwartz. Ms. Wewerka stated that this procedure is followed in many areas of the religion schedules which are subdivided by publication date and which contain a large amount of material. Although LC understands the separation may seem unusual, it functions to gather recent material together. Based on this response, the new arrangement appears to be permanent.

There are pros and cons to separating by date first and then form as opposed to form first and then date. If separating by date first, shelf browsing by form will be hindered by having to skip over other types of material to reach the next date cluster of commentary material. This won't be a problem for those of the philosophy that a call number serves as a locator rather than a co-locator. Whether a library has open or closed stacks, or call number browsing capabilities in their computer catalogs may affect viewpoints in this regard. Separating by date is helpful for the kind of material that becomes dated easily, so that someone looking for contemporary information or viewpoints doesn't have to browse through as many items. And it has been pointed out that separating by date also alleviates the tight cutting that would be required in a large and still growing collection.

## KOREAN LANGUAGE WEB TUTORIALS

Here are two web tutorial sites for anyone interested in learning the Korean language on their own in the hopes of becoming proficient at cataloging Korean materials. You will need to make sure your PC and your browser have Korean fonts (which are downloadable) to be able to view the script as well as sound capabilities to be able to hear the pronunciation sound clips. Both include practice exercises. If you have software that allows you to type in Korean, there are areas in the tutorials for you to be able to do that.

1) *Korean Studies at Sogang University* <http://korean.sogang.ac.kr/>

This site provides extensive online tutorials at several levels: introductory, three levels of novice, and three levels of intermediate. You need to register to use it, but it's free, and very well done.

2) *An Introduction to Korean*, by J. David Eisenberg <http://www.catcode.com/kintro/>

Not quite as extensive as the site mentioned above, but very user friendly. It is designed more for the non-academic.
